Granite Surface Options

Polished

Smooth, glossy and reflective, polished surface granite is a durable and elegant natural stone with a mirror-like finish, enhancing the beauty and colour variations of the stone.

Flamed

Has a textured, rough finish achieved by exposing the stone to high heat, resulting in a rugged, non-slip surface.

Leathered

Features a textured, matte finish that resembles the texture of leather. It offers a unique and sophisticated look, combining the natural beauty of the stone with a subtle tactile appeal.

Lepatora

Originating in Italy, it offers a granular, worn-out, yet stylish look. Its non-slippery, easy-to-clean surface combines muted and glossy elements along with matte appearance.

Granite Surface Options

Honed

Has a smooth, matte finish achieved by grinding the stone to a uniform, low-gloss appearance. It offers a refined and understated look with a velvety texture.

Bush-hammered

Features a textured, rough finish achieved by using a specialized tool with pointed hammers. It creates a distinctive, non-slip surface with a natural, weathered appearance.

Brushed

Has a textured, matte finish achieved by brushing the stone's surface with stiff bristle brushes. It offers a subtle, rustic charm with a soft and velvety feel.

Matte

Surface is anti-skid and gives beautiful natural raw look of the granite.

Sandstone Finishes

Natural/Unpolished Finish: The stone retains its natural texture and appearance, providing a rustic and organic look. It is often used for garden pathways, patios, and landscaping.

Honed Finish: The surface is smooth and matte, achieved by polishing the stone to remove surface imperfections without a high gloss. Suitable for indoor flooring and wall cladding.

Tumbled Finish: The stone is polished lightly and then tumbled to give a weathered, antique appearance with rounded edges. Ideal for outdoor applications like walkways and patios.

Bush-Hammered Finish: A textured surface created by hammering the stone with a specialized tool, giving a rough, slip-resistant surface, often used for paving.

Brushed Finish: The surface is brushed to create a soft, textured feel, providing a non-slip surface suitable for outdoor stairs and walkways.

Sandblasted Finish: The stone is blasted with sand to produce a textured, matte surface, enhancing slip resistance and visual interest.

Flamed Finish: A highly durable, slip-resistant, and textured surface created by applying an intense, high-temperature flame to the stone.
